

Level of Achievement / Personal Goals:

Howard DaCosta : A / Understand the entire pipeline of web app development, build skills in frontend and database creation

Joshua Verdejo : A / Become more competent in full stack development, understanding the full development process.

Nikodimos Sendek: A / challenge current full stack development knowledge, expand it more

Violetta Jusiega : A / become more comfortable with connecting front and backend, understand databases more, explore frontend possibilities

Team Meetings:

Roughly twice a week over Zoom, longer working sessions (1hr +) on Fridays and catch ups during the week.

Quality of Work (GREAT) will be maintained by:

- Never pushing broken code
- Commenting and documenting well
- Small, well-documented pushes
- Thought out file structure before implementation

Assigning Tasks:

- Meetings at the beginning of the week to discuss deliverables and goals
- Work will be split as evenly as possible
- We will communicate what we are interested in developing
- Missed deadlines should be communicated in advance, other team members can take on task if there are significant difficulties/bugs

Decisions and disagreements:

All major decisions and disagreements will be handled with a vote, going to the TA supervisor if the vote is split and each group feels especially passionate
